

Goal

The Amsterdam Economic Board stimulates innovation and collaboration between businesses, knowledge institutes and government organisations. Our goal is sustainable economic growth in the Amsterdam Metropolitan Area.

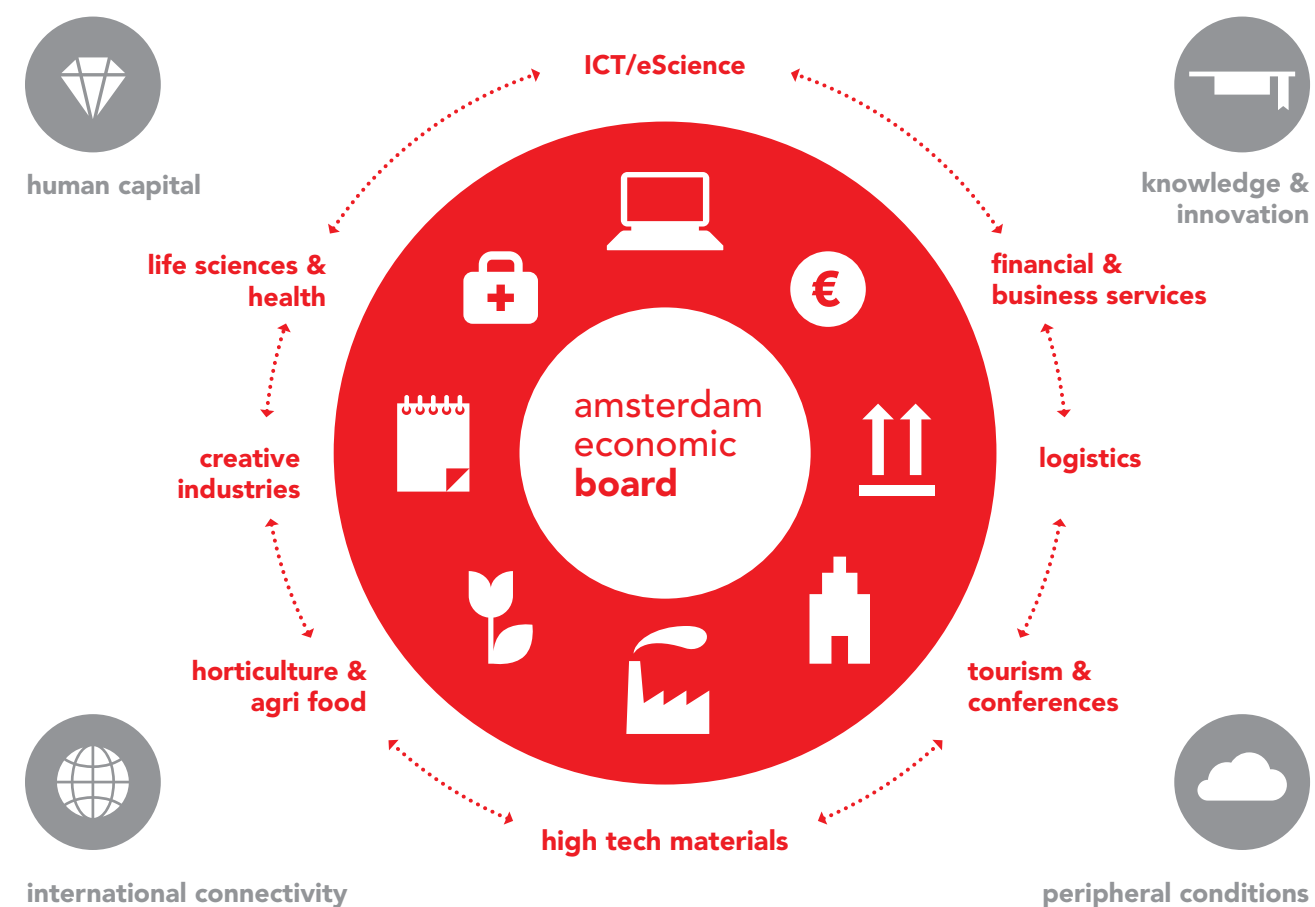

Collaboration

The Board brings parties together for economic growth in the Amsterdam region. We help these parties by:

- Identifying opportunities
- Finding and bringing together collaboration partners
- Providing access to the regional and international networks of the Board and clusters
- Creating physical and virtual meeting points
- Indicating financing and accommodation possibilities
- Initiating projects and staying engaged until execution
- Facilitating participation to trade missions

Innovation

Cross-overs between different sectors (clusters) lead to unique combinations by which the Amsterdam Metropolitan Area can distinguish itself from other regions. An example of a cross-over is E-Health, the smart use of IT in the healthcare sector.

Drivers for economic growth are Human Capital, Knowledge & Innovation and International Connectivity, taking peripheral conditions, such as sustainability and liveability into account.

Growth

The Board stimulates growth by:

More (international) talent

Growth of the international labor market in the AMA and increasing the number of foreign students at master level.

Access to R&D

Improving access to R&D facilities for entrepreneurs and encouraging new forms of (cross-over) cooperation between entrepreneurs themselves and knowledge institutions.

Start-ups / spin-offs

Boosting start-ups through incubators and spin-offs of universities.

Living labs / innovative applications

Providing a platform for testing smart and innovative applications.

Sustainable business activities

Stimulating new and sustainable business and strengthen the bio-based ecosystem.

Creating a strong business climate

Identifying and, if possible, eliminating procedural barriers and obstacles for the improvement of the business climate in the AMA.
