MEDICPAD COVID-19 SOLUTIONS

MEDICPAD INFRARED

Is a solution designed specifically for touch-less triage kiosks. It embeds an infrared camera that is able to detect infrared energy emitted by persons.

THERMAL CAMERA APP

MEDICPAD CLINIC SELF-SERVICE KIOSK

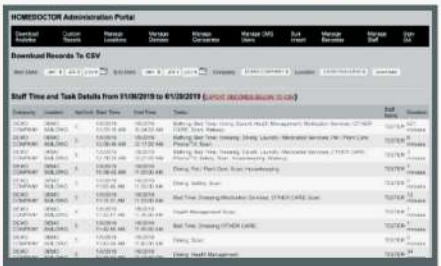
In the context of quickly diagnosing patients that suffer from fever, as in the context of the new coronavirus pandemic. MedicPad Infrared should be among the tools for clinics, hospitals aeroports, etc, use in the first line of diagnosing COVID-19 patients, without the touch of a button.

MEDICPAD WEARABLE BLE DEVICE

Is a simple wearable device which has an alarm button integrated so the patient can send instant alerts or call for assistance (e.g. fallen down, medication time and IV replace, etc.) by SMS / E-mail / Phone call.

MedicPad addresses the needs of patients and healthcare professionals by reducing long waiting times, medical errors and outdated clinical examinations in an already overloaded healthcare system.

A VIRTUAL PLATFORM THAT FACILITATES A BETTER HOME CARE AND DISTANCE MONITORING. BY SIMPLY SCANNING THE QR CODE AVAILABLE AT THE PATIENT LOCATION, THE CAREGIVER CAN TRACK THE PLAN OF CARE, ALLOWING FOR ANY THIRD PARTY SUCH AS MANAGEMENT OR FAMILY MEMBERS TO HAVE ACCESS TO ACTIVITY REPORTS.



MEDICPAD ANALYTICS

Integrates advanced BI reporting for forecasting capacity, patient illness, executive dashboard for operational efficiency. With the overload of activities each healthcare professional has to perform, an analytical tool to allow for increased efficiency and decreased risk should be the solution each public hospital or private clinic integrates in the day-to-day activity planning, avoiding siloed data, poor quality of performance and coordination.

MEDICPAD ACTIVITY TRACKER APP

GET IT ON Google play | Available on the App Store

EASILY TRACK YOUR NURSING STAFF

Digitize daily nurse activities and easily monitor tasks performed per patient.
